Continuation of Attachment(s) 9. Other: Applicants' amendment filed 12/05/2005 has now overcome the prior art of record. This application was searched and re-searched in class 438, subclasses 14, 15, 106, 107, 110, 112, 119, 125-127; Class 257, subclasses 678, 100, 433, 434, 667, 787-796, E31.117, E31.118, E51.02, E23.116, E23.14, in view of the limitations of the claimed invention. The re-search was ineffective. A reference of Lo et al. (US 6,933,175 B2) is cited of interest and should be considered. As seen in Figs. 3A-3C, Lo et al show the steps of -attaching a semiconductor die to a substrate; - positioning a housing on the substrate; -positioning a mold over the housing; and injecting a molding material into a cavity with partially at an exterior of the housing. However, Lo et al fail to apply the molding material only to an exterior of the housing which to ensure that no molding material can contaminate the semiconductor die. .
